Projects

Outpace

– An agentic SDR platform that ingests a sales rep's own research guide, email template, and outreach cadence, then autonomously researches prospects, drafts personalized outreach, and manages follow-up sequences, replacing the manual grunt work of early-stage sales for founders and small teams without a full sales headcount.
– **Stack:** React, FastAPI, PostgreSQL, Node.js

Alfred

– An Electron-based AI desktop assistant that lives as a lightweight, always-on-top floating icon, guiding you step-by-step through whatever application you're using, powered by a vision-enabled LLM.
– **Stack:** Electron, React, TypeScript, Node.js, Claude API (Vision)

SlouchFix

– A privacy-first desktop application that uses webcam-based facial landmarks to detect poor posture and unsafe screen distance in real time, delivering non-intrusive alerts during long coding sessions.
– **Stack:** Python, OpenCV, MediaPipe Face Mesh, scikit-learn, XGBoost

Deja View

– A movie and show tracking platform where you rate and review what you've watched, helping you decide what's worth rewatching, surface tailored recommendations for your next watch, and share picks with friends.
– **Stack:** React, FastAPI, SQLAlchemy, PostgreSQL, OMDb & TMDB APIs
